

Sync-and-Charge iPads in Secure Storage

Secure and compact, this cabinet is perfect for classrooms, libraries and training facilities where multiple iPads have to be protected and charged. And it takes up very little physical space.

Secure: The Netsafe has a highly secure integrated locking mechanism, the hallmark of all Datamation Systems products. You work hard for your technology resources. You might as well protect them with a real level of security.

Sync: The DS-NETSAFE-IPCS simultaneously syncs or charges up to 16 iPads and plugs into a standard wall outlet. Uses USB 2.0 connection to iTunes and Apple Configurator. If you keep your iPads in cases, its dividers can be adjusted to handle even the thickest cases we have seen. (Not all carts and cabinets can say this.)

Sustainable: Uses Apple-provided cables, reducing waste and lowering costs for our customers; made with recycled material where possible; energy-efficient design; durable and adjustable so it can change with new technology.

Model #DS-NETSAFE-IPCS

Item #11397

- Durable steel construction and industry-best locking mechanism
- Steel cabinet houses custom steel enclosure with 16-port, state-of-the-art USB hub that meets iPad™ specs for simultaneously charging or syncing to iTunes™ (on Mac)
