

Secure Charging Safe for iPad minis & 7" Tablets

Secure and compact, this cabinet is perfect for classrooms, libraries and training facilities where multiple iPad minis (and any other 7" tablets) have to be stored and charged. And, like the minis themselves, it takes up very little physical space.

Secure: The Netsafe has a highly secure integrated locking mechanism, the hallmark of all Datamation Systems products. You work hard for your technology resources. You might as well protect them with real security.

Charge: The DS-NETSAFE7-C-16 simultaneously charges up to 16 iPad minis or other 7" mobile devices and plugs into a standard wall outlet. It uses the manufacturer-provided AC adapters with a specially designed power panel that leaves space for all types of plug systems (110V only).

Flexibility: If you keep your tablets in cases or use them with scanners, battery packs or accessory "sleds", The NETSAFE's dividers can be adjusted to handle even the thickest configurations we have seen. (Not all carts and cabinets can say this.)

Sustainable: The NETSAFE uses device-provided AC adapters, reducing waste and lowering costs for our customers; made with recycled material where possible; energy-efficient design; durable and adjustable so it can change with new technology.

Model #DS-NETSAFE7-C-16

Item #10671

- Durable steel construction and industry-best locking mechanism
- Steel cabinet houses custom steel enclosure with 16 power outlets
- Extremely compact footprint: takes up very little desk or counter space
