

Universal 16-port USB Sync-Charge

Model # DS-SC-U16

Dell SKU # A7427798

For the first time anywhere, there is a universal USB charger that adjusts each port to the optimal charging profile for each device as it is plugged into the hub. This version also acts as a USB hub for file transfer and syncing content.

It also features a simultaneous charge and sync function that charges devices while connected to a host.

It will charge iPads™, iPods™, iPhones™, mobile phones, Kindles™, Nooks™ and other eReaders, tablets, VR headsets, cameras; virtually any device that charges with USB. For syncing, USB devices that can be managed through a host connection can be recognized for file management. iTunes™, Configurator and MDM software that connects through USB will sync to devices on these hubs.

This advanced, professional hub is also **future-proof**: its firmware can be updated with new charging profiles as new USB devices are introduced.

It is perfect for convenience charging, tech centers, service depots, trade shows and institutional users who want a durable professional charging and syncing hub.

- Compact, durable, easy-to-use form factor
- Use on a desk or counter or with an optional carrying case
- Custom steel and brushed anodized aluminum enclosure houses a state-of-the-art, professional 16-port USB board powered by Cambrionix, the most respected leader in USB charge & sync technologies
- Cambrionix's innovative ChaSync+ feature provides simultaneous charge and sync while connected to a host
- Includes a **mini-USB port** for updates: Download new charging profiles from the web and update the hub's charging firmware; assures settings to manufacturer's optimum charging profiles, preserving battery life. Also includes **USB-B port** for host communication. (USB A-micro and USB A-B cables included.)
- Also equipped with two USB-A expansion ports for daisy-chaining multiple hubs
- Power supply plugs into wall outlet with cord (provided)
- Power supply: 225W, 5V, 85~264VAC, constant current limiting circuit, overload/overvoltage/short circuit protection, all applicable safety approvals. Power supply is dual voltage 115/230 VAC.
- Can be used for iPads (at their full 2.1A charge on each port), iPod, iPod Touch and iPhone; mobile phones; many Android and Windows tablets; VR headsets, cameras; Kindles, Nooks and eReaders; virtually any USB connected device
- The hub and each port can be controlled with user-created scripts (USB terminal emulator commands) for special applications, a completely unique feature. Cambrionix's API is a powerful tool, permitting remote access and monitoring of connected devices, something no other hub provides.
- Weight: 4.5 pounds
- Dimensions: 2.25"H x 18.5"L x 4"W
- ETL, CE
